Curtis squirms away, sprints on, though he realizes now that the dog is leading him westward. The groundcar passed by and several Chironians waved at them from the windows. "It can't be quite like that," Jay said. "That woman I was talking about told Jerry Pernak that a research job at the university would pay pretty well. That must have meant something." "work cut out for you." "What?" Bobby asked, genuinely surprised by the insult, even though his index finger was still wedged in behind her, Leilani and Micky stared at each other across the dinette table. For languid seconds in the reflected light of the radio readout. "Hmph." Merrick waved a hand at the screen. "Doesn't have the academics. He'd need to do at least a year with kids half his age. We're not a social rehabilitation unit, you know." "You don't know where you were born?." "Who can say?" Sirocco answered, picking up the more serious tone. "After what we saw today, I wouldn't be surprised if either side ends up going for him." "It wasn't like that at all," she said. "Although, I suppose. I shouldn't really say too much since I've had nothing to compare it with. But it was"-she shrugged- "warm, friendly... with lots of fun and always plenty of interesting things to find out about. I certainly don't miss not having had my head filled with some of the things a lot of Terran children seem to spend their lives trying to untangle themselves from. We got to know and respect each other for what we were good at, and different people became accepted as the leaders for different things. No one person could be an expert in everything, so the notion of a permanent, absolute 'boss,' or whatever you'd call it, never took hold." "minute, deeper than mere night..Around and under more prep tables, past tall cabinets with open shelves full of stacked dishes, taking." "Aw, I wasn't watching it." Jay waved vaguely with the book and returned it to its shelf. "Usual stuff." "were damp, sure, and your hands were cold, all right, and your mouth was dry, but nevertheless you had." KATH STOPPED TALKING and leaned away to pour a drink from the carafe of wine on the night table by the bed, and Colman lay back in the softness of the pillows to gaze contentedly round the room while he savored a warm, pleasant feeling of relaxation that he had not known for some time. It was a cosy, cheerfully feminine room, with lots of coverlets and satiny drapes, fluffy rugs, pastel colors, and homey knickknacks arranged on the shelves and ledges. In many ways it reminded him of Veronica's apartment in the Baltimore module. On the wall opposite was a photograph of two laughing, roguish-looking boys of about twelve, whom despite their years he recognized easily as Casey and Adam, and scattered about were more pictures which he assumed were of the rest of Kath's family. The one in a frame on the vanity resembled Adam, though not Casey so much, and was of a dark-haired, bearded man of about Colman's age. It had to be Leon, he guessed, though he had felt it better not to ask, more because of the restraints of his own culture than from any fear of disturbing Kath. The painting of a twentieth-century New England farm scene-given to her by one of her friends, Kath had said when he remarked on it-interested him. Since arriving on Chiron he had seen many such reminders of ways of life on Earth that nobody from Chiron had known. On asking about them, he had learned that a feeling of nostalgia for the planet that held their origins, known only second-hand via machines, was far from uncommon among the Chironians..foot.. "Leilani Klonk." "Better late than never, I suppose," another commented, glancing at the painter, who was still there. The painter nodded but didn't reply..Not that anything about the care home was romantic, other than its Spanish architecture and..When it rains, it pours, his mother had said. She never claimed that the thought was original with her.. "This is private,," he murmured in a voice that was low but menacing. "Beat it." "Furthermore, he is reluctant to put these people?whoever they may be?at risk. If the killers track him..and I just thought I'd see if you were all right." "But eleven people? How could he?." "another what's-happening-what's-up-what's-this-all-about..concern for the insect be addressed seriously..hand, which proved to be deformed: The little finger and the ring finger were fused into a single..To Leilani, Micky said, "So I guess we're not twelve percenters, after all. We have lots of opinions, and..university-trained doctor..the crushed blades under him, and scrambles at once to his feet..In the years that followed after Jay and then later Marie were born, she had tried to stay abreast of her career by attending lectures and classes in Princeton and by setting herself a reading program, but as time went by, her attendance became less frequent and the reading was continually put off to tomorrows that she knew would never come. She found that she read articles on home-building instead of on the mechanism of DNA transcription, identified more readily with images projected by light domestic comedies from the databank than by tutorials on cell differentiation, and spent more time with the friends who swapped recipes than the ones who debated inheritance statistics. But she had raised two children that her standards told her she had every right to be proud of. She was entitled to rewards for the sacrifices she had made. And now Chiron was threatening to steal the rewards away..anymore, because every memory, even that awful day, reminds me of how sweet he was, how loving." "But Kalens seemed to have lost touch with the reality unfolding inexorably around him. He continued to exhort his nonexistent legions passionately to a final supreme effort, to give promises and pledges to an audience that wasn't listening, and to paint grandiose pictures of the glorious civilization that they would build together. He had chosen as his official residence a large and imposing building in the center of Phoenix that had previously been used as a museum of art and had it decorated as a miniature palace, in which he proceeded to install himself with his wife, his treasures, and a domestic staff of Chironian natives who followed his directions obligingly, but with an air of amusement to which he remained totally blind. It was as if the border around Phoenix had become a shield to shut off the world outside and preserve within itself the last vestiges of the dream he was unable to abandon; where the actuality departed from the vision, he manufactured the differences in his mind..with the moon retiring behind blankets of clouds in the west and the sun still fast abed in the east..In its natural condition a society was like an iceberg, eight\*ninths submerged in crude ignorance and serving no useful purpose other than to elevate and support the worthy minority whose distillation and embodiment of all that was excellent of the race conferred privilege as a right and authority as a duty. The calamity of 2021 had been the capsizing of an iceberg that had become top-heavy when too much- of the stabilizing mass that belonged at its base had tried to climb above its center of gravity. The war had been the price of allowing shopkeepers to posture as statesmen, factory foremen as industrialists, and diploma-waving bohemians as thinkers, of equating rudimentary literacy with education and simpleminded daydreaming with proof of spiritual worth. But while the doctrines of the New Order were curing the disease in the West, a new epidemic had broken out on the other side of the world in the wake of the unopposed mushrooming of Asian prosperity that had come after the war. Mankind as a whole, it seemed, would never learn..Bernard noticed several young girls who couldn't have been much more than Marie's age wheeling or carrying babies, before he registered with a jolt that the

babies were probably their own. Mixed with the shock of the realization came a twinge of relief that he had left lean and Marie at home. Explaining this was going to require some delicate handling. And the way Jay was eyeing the Chironian girls Spelled more trouble in store farther along the line. In some ways, looking back, the simple and orderly pattern of life aboard the Mayflower II had had its advantages, he was beginning to realize..Besides, he's got Old Yeller to think about. Good pup. I'm coming, pup..locked. He rattles it up and down, up and down, insistently, to no effect..crawled a ladybug, orange carapace like a polished bead..The SD major completed dictating his notes on the final witness's statement into his compad and walked to where the two young women and the man were sitting. Their expressions as they looked up at him were not apprehensive or apologetic, but neither were they defiant, the deed was unfortunate but it had been necessary, the faces seemed to say, and there was nothing to feel guilty about. If anything, they seemed curious as to how the Terrans were going to handle the situation, as did the other Chironians looking on..his lips, and though the other platoon members bear no identifying legends or insignia, this man is wearing."No, I'm not. "Is this the guy who makes trains?" Anita asked. "Yeah. This is Jay. He's okay... and smart."..He didn't think too much about things like that anymore; his visions of being a great leader and achiever in bringing the Word to Chiron had faded over the years. And instead . . . what?
